

# Future-Proofing Your Network with 400G

The status quo is no longer an option. The relentless demand for video drives the 400G era. Scale up and scale out cloud network infrastructure with flexibility, efficiency, and security. Build resilient cloud networks prepared for the knowns and unknowns associated with new applications and dynamic traffic patterns.

## PTX Series Packet Transport Routers

### Powerful, Efficient, Reliable

- Industry-only 400G in-line MACSec - security without performance penalty
- Purpose-built silicon delivers highest density at lowest cost per bit
- One Junos Experience - the most modern cloud routing OS for operational consistency

## MX Series 5G Universal Routers

### Secure, Uncompromising, Resilient

- 400GbE-capable MPC10E & MPC11E line cards for Cloud-era traffic scale
- End-to-end automation portfolio enabling a self-driving network
- Integrated security with automated threat detection and mitigation capabilities protecting users, applications, and infrastructure

## QFX Series Switches

### Managed, Automated, Orchestrated

- High-performance 400GbE switches secure and automate cloud and data center networks
- Fast EVPN-VXLAN fabric - hyperscale design with enterprise simplicity
- Contrail SDN-enabled management and software for simplified service delivery

**Ready to future-proof your network?**
